1. Comment. The trains were previously reported from the border crossing station. 25X1
2. Comment. Presumably, return shipments of empty cartridge cases to the USSR.
3. Comment. Report shows only insignificant traffic during the period of observation and, thus, confirms the assumption that the large ammunition depots are well stocked up and almost exclusively serve as reserve depots. Ammunition supply seems to have been shipped directly to the troops since the beginning of 1953.
